

Aerodrome – Light Vehicle Access Request Process

Please fill out the required information (below) for each request **with 24 hours notice**, and forward it to the 4 email addresses listed below.

The driver of the vehicle should park in the area designated “Drilling Parking Only” at the south end of the Aerodrome parking lot. Please be mindful of bus traffic when driving in the parking lot and walking between the terminal and the drilling parking area.

While 24 hours notice is preferred, in the event less time is available for access request, please follow the above process and also place a call to Firebag Security Dispatch at **780-598-0835**.

Inbound and outbound passengers being picked up or dropped off in a light vehicle must identify themselves to Security upon arrival at the Aerodrome for tracking of access requests.
